Summary

Entry-level IT and Network Support professional with hands-on knowledge of networking, troubleshooting, and technical support. Recently completed CCNA training with practical experience in Cisco Packet Tracer and GNS3, including IP addressing, routing, switching, DHCP, OSPF, and network troubleshooting. Familiar with basic Active Directory and Microsoft 365, along with hardware and software troubleshooting. Strong problem-solving approach with a practical interest in IT support, desktop support, technical support, and network operations.

TECHNICAL SKILLS

OSI Model, TCP/IP, Ethernet, IPv4, MAC Addressing, ARP, IP Addressing, Subnetting, Default Gateway, Routing Tables, VLANs, Trunking, Inter-VLAN Routing, Static Routing, OSPF, DHCP, DNS, NAT, SSH, ICMP, Network Connectivity Troubleshooting, IP Configuration, Ping, Tracert/Traceroute, Basic Network Diagnostics, Windows Support, System Configuration, Hardware & Software Troubleshooting, Basic Active Directory, Basic Microsoft 365, Cisco Packet Tracer, GNS3, Network Monitoring Tools

EDUCATION

Bachelor of Technology - Electronics & Communication Engineering, Welfare Institute of Science Technology & Management	2026
Diploma in Electronics & Communication Engineering (ECE) Sai Ganapathi Polytechnic College	2023

NETWORKING PROJECTS

1. ARP, ICMP & Wireshark Packet Analysis – Network Troubleshooting

- Captured and analyzed ARP and ICMP packet behavior to understand communication within and across networks.
- Used Wireshark to inspect packet-level communication and identify network connectivity issues.
- Performed basic network troubleshooting using Ping, Tracert/Traceroute, IP configuration, and CLI commands.

2. DHCP Implementation & Network Services – GNS3 / Cisco Packet Tracer

- Configured and tested DHCP for automated IP address allocation across multiple network segments.
- Analyzed DHCP Discover, Offer, Request, and Acknowledge (DORA) packet exchanges using network simulation and packet analysis.
- Troubleshot DHCP configuration, IP address allocation, and connectivity issues in simulated network environments.

3. Static, Default & Dynamic Routing – GNS3 / Cisco Packet Tracer

- Designed and configured multi-router network topologies using static, default, OSPF, and EIGRP routing.
- Configured routing between multiple subnets and verified route learning and end-to-end connectivity.
- Troubleshot routing issues using routing tables, Ping, Tracert/Traceroute, and Cisco CLI commands.

4. OSPF Enterprise Network Implementation – GNS3 / Cisco Packet Tracer

- Configured and tested OSPF in multi-router enterprise network topologies.
- Verified OSPF neighbor relationships, route advertisement, routing tables, and network connectivity.
- Troubleshot OSPF configuration and routing issues during practical network implementation.

5. Cisco Switching & Inter-VLAN Routing – Cisco Packet Tracer

- Designed and configured multi-switch networks using VLANs, trunking, EtherChannel, and VTP.
- Implemented Inter-VLAN Routing using Router-on-a-Stick and SVIs for communication between VLANs.

- Configured STP/RSTP for Layer 2 loop prevention and network redundancy.
- Verified switching and connectivity using Cisco CLI troubleshooting commands.

6. Network High Availability & Gateway Redundancy – GNS3 / Cisco Packet Tracer

- Configured and simulated HSRP and VRRP as First Hop Redundancy Protocols (FHRP).
- Tested gateway redundancy and failover behavior to understand high-availability network design.
- Verified connectivity and analyzed network behavior during gateway redundancy scenarios.

INTERNSHIP & TRAINING

Network Trainee — BSNL | 6-Month Industrial Internship

12/2022 - 06/2023

- Gained hands-on exposure to a professional technical environment through field-based networking and telecommunications activities.
- Performed fiber organization in network rooms.
- Used OTDR for basic fiber testing and fault identification. fiber splicing, FTTH wiring, fiber troubleshooting
- Gained practical experience in LAN cable crimping and computer hardware troubleshooting.
- Assisted with technical equipment organization and store room management.

CCNA Training — Tungabhadra Networks Pvt. Ltd.

08/2026

- Gained hands-on exposure to Cisco routers and switches, including configuration and troubleshooting.
- Configured and troubleshot static routing and OSPF in practical network labs.
- Performed switching configurations including VLAN and VTP and practiced network connectivity troubleshooting.
- Built and configured network topologies using Cisco Packet Tracer and GNS3.
- Developed practical understanding of routing, switching, IP addressing, DHCP, NAT, SSH, and network troubleshooting.

DECLARATION

hereby declare that the information provided in this resume is true and accurate to the best of my knowledge and belief.
